

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1-10 (canceled).

Claim 11 (currently amended): An aerosol formulation comprising budesonide, a propellant vehicle, and an antioxidant,

wherein said budesonide is completely dissolved in the propellant vehicle and said propellant consists of one or more hydrofluoralkanes and a cosolvent.

Claim 12 (currently amended): The ~~pharmaceutical composition~~ formulation of claim 11, wherein said antioxidant is ascorbyl palmitate.

Claim 13 (currently amended): The ~~pharmaceutical composition~~ formulation of claim 11, wherein said antioxidant is a tocopherol ester.

Claim 14 (currently amended): The ~~pharmaceutical composition~~ formulation of claim 11, wherein said antioxidant is selected from the group consisting of ascorbic acid, ascorbyl palmitate, butylated hydroxytoluene, butylated hydroxyanisole, and tocopherol esters.

Claim 15 (canceled).

Claim 16 (currently amended): The ~~pharmaceutical composition~~ formulation of claim 11, wherein the propellant vehicle is 1,1,1,2-tetrafluoroethane, 1,1,1,2,3,3,3-heptafluoropropane, or a mixture thereof.

Claim 17 (currently amended): The ~~pharmaceutical composition~~ formulation of claim 11, wherein said cosolvent is an alcohol.

Claim 18 (currently amended): The ~~pharmaceutical composition~~ formulation of claim 17, wherein said alcohol is ethanol.

Claim 19 (currently amended): A pressurized metered dose inhaler comprising a container equipped with a metering valve and containing a pressurized aerosol formulation comprising

budesonide, a propellant vehicle, and an antioxidant, wherein said budesonide is completely dissolved in the propellant vehicle and said propellant consists of one or more hydrofluoralkanes and a cosolvent.

Claim 20 (canceled).

Claim 21 (previously presented): The pressurized metered dose inhaler according to claim 19, wherein said propellant vehicle is 1,1,1,2-tetrafluoroethane, 1,1,1,2,3,3,3-heptafluoropropane, or a mixture thereof.

Claim 22 (previously presented): The pressurized metered dose inhaler according to claim 19, wherein said cosolvent is an alcohol.

Claim 23 (previously presented): The pressurized metered dose inhaler according to claim 22, wherein said alcohol is ethanol.

Claim 24 (previously presented): The pressurized metered dose inhaler according to claim 19, wherein said antioxidant is ascorbyl palmitate.

Claim 25 (previously presented): The pressurized metered dose inhaler according to claim 19, wherein said antioxidant is a tocopherol ester.

Claim 26 (currently amended): A method for the treatment of a bronchial disorder in a subject in need thereof comprising administering to said subject an aerosol formulation comprising

budesonide, a propellant vehicle, and an antioxidant, wherein said budesonide is completely dissolved in the propellant vehicle and said propellant consists of one or more hydrofluoralkanes and a cosolvent[.].

Claim 27 (canceled).

Claim 28 (previously presented): The method according to claim 26, wherein said propellant vehicle is 1,1,1,2-tetrafluoroethane, 1,1,1,2,3,3,3-heptafluoropropane or a mixture thereof.

Claim 29 (previously presented): The method according to claim 26, wherein said cosolvent is an alcohol.

Claim 30 (previously presented): The method according to claim 29, wherein said alcohol is ethanol.

Claim 31 (previously presented): The method according to claim 26, wherein said antioxidant is ascorbyl palmitate.

Claim 32 (previously presented): The method according to claim 26, wherein said antioxidant is a tocopherol ester.

Claims 33-34 (canceled).

Claim 35 (previously presented): The pressurized metered dose inhaler according to claim 19, wherein at least a part of the inner surfaces of said pressurized metered dose inhaler is composed of stainless steel.

Claim 36 (previously presented): The pressurized metered dose inhaler according to claim 35, wherein the entirety of the inner surfaces of said pressurized metered dose inhaler is composed of stainless steel.

Claim 37 (previously presented): The pressurized metered dose inhaler according to claim 19, wherein at least a part of the inner surfaces of said pressurized metered dose inhaler is composed of anodized aluminum.

Claim 38 (previously presented): The pressurized metered dose inhaler according to claim 37, wherein the entirety of the inner surfaces of said pressurized metered dose inhaler is composed of anodized aluminum.

Claim 39 (previously presented): The pressurized metered dose inhaler according to claim 19, wherein at least a part of the inner surfaces of said pressurized metered dose inhaler is coated with an inert organic coating.

Claim 40 (previously presented): The pressurized metered dose inhaler according to claim 39, wherein the inert organic coating is an epoxy-phenol resin coating.

Claim 41 (previously presented): The pressurized metered dose inhaler according to claim 39, wherein the inert organic coating is a multifunctional resin coating composed of an epoxy-phenol-novolac resin or an epoxy-cresol-novolac resin.

Claim 42 (previously presented): The pressurized metered dose inhaler according to claim 39, wherein the inert organic coating is a perfluoroalkoxyalcane resin or a fluorinated-ethylene-propylene polyether sulfone resin.

Claim 43 (previously presented): The pressurized metered dose inhaler according to claim 39, wherein the entirety of the inner surfaces of said pressurized metered dose inhaler is coated with an inert organic coating.

Claim 44 (previously presented): The pressurized metered dose inhaler according to claim 43, wherein the inert organic coating is an epoxy-phenol resin coating.

Claim 45 (previously presented): The pressurized metered dose inhaler according to claim 43, wherein the inert organic coating is a multifunctional resin coating composed of a epoxy-phenol-novolac resin or a epoxy-cresol-novolac resin.

Claim 46 (previously presented): The pressurized metered dose inhaler according to claim 43, wherein the inert organic coating is a perfluoroalkoxyalcane resin or a fluorinated-ethylene-propylene polyether sulfone resin.

Claim 47 (canceled).

Claim 48 (previously presented): The method according to claim 26, wherein said administering is metered dose administration to the respiratory tract of said subject via oral inhalation.

Claim 49 (previously presented): The method according to claim 26, wherein said aerosol formulation is contained within a pressurized metered dose inhaler comprising a container equipped with a metering valve.
